# Track Pads Australia

## Tracks, pads and much more.

Through Track Pads Australia, we offer an expert-curated selection of the best premium rubber tracks and track pads on the market.

We also offer specialty drum mounts and rubber buffers, wear parts for pavers, excavators, and earthmoving equipment - plus undercarriage components for a range of excavators and pavers.

-  Fast dispatch
-  Super-high tensile strength, tear-resistant rubber
-  Quick and easy to install to maximise uptime

We cover all market-leading excavator brands including Bobcat, Caterpillar, Hitachi, Hyundai, Komatsu, Wacker Neuson, Yanmar and more.

 See the full range at [conplant.com.au/trackpads](https://conplant.com.au/trackpads)

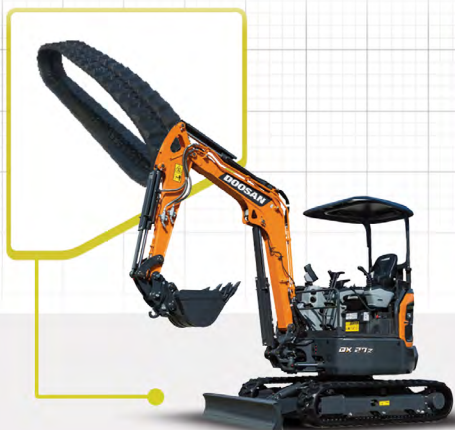

## Quality you can count on.

**Rubber** — Our Anti Vibration Mounts are made from the same top-quality, heavy-duty rubber as our rubber pads so you know you're getting top quality.

**Steel plates** — These are individually electro-plated and enameled to prevent rusting. They are also sand blasted to ensure a strong bond with the rubber. In construction, the rubber and steel plates are pressurised under high temperature vulcanization to make sure the composition is evenly stabilised for the best performance.

**Mounting holes** — Made with reinforced steel the mounting holes are as strong as you'll find.

**Adhesive** — Manufacturing with a proven technique the steel plates will not peel off from the rubber during normal operation.

### Rubber Tracks

Every major make and model covered. Our tracks are built to last, and keep your worksite moving.

### Rubber Pads

High quality bolt-on, clip-on or chain-on pads, that are easy to mount and change, saving you time on the worksite.

### Rubber Buffers

Heavy-duty and tear-resistant, our rubber buffers, drum mounts and more are made with the highest quality to ensure peak performance.

Super-durable drop-forged steel teeth

Specially-formulated adhesive for a superior bond

High tensile strength

Cut and tear resistant

Comprehensively tested for a perfect fit

# The best premium rubber tracks on the market.

Our tracks and pads are built tough for all of your earthmoving, landscaping, demolition, and trenching applications.

All manufactured with a superior level of precision to stand up to the rigors of working in harsh Australian earthmoving and construction conditions.

We have tracks for:

Excavators

Dumpers

Skid Steer Loaders

ASVs

Mini Loaders

Agricultural Equipment

# Pads and Buffers

Our range of pads and buffers are made to survive the most extreme conditions, while still being easy to install and remove. Go with our pads and buffers for an easier, more efficient workday.

## Rubber buffers built to stand up to the challenge of tough Australian worksites.

Advanced high-temperature rubber lasts 3x times longer than standard

Reinforced steel plates that won't deform or break

Tear-resistant for maximum force with less downtime and service delays

Triple-treated with adhesive to prevent peeling

Innovative shock absorption system

Heated, electroplated and treated for anti-corrosion in the harshest environments

Withstands critical temperatures and extreme forces

## Chain-on, clip-on and bolt-on pads for the perfect fit and a longer life for your machines.

3x the service life and up to 5,000 working hours

Stable and smooth performance

Improved shock absorption and tear resistance

Heavy-duty steel backing

Clever features to make your life easier

**Get in touch** to see the full range of shapes and styles. We have tracks and pads to fit every machine and suit any application.
