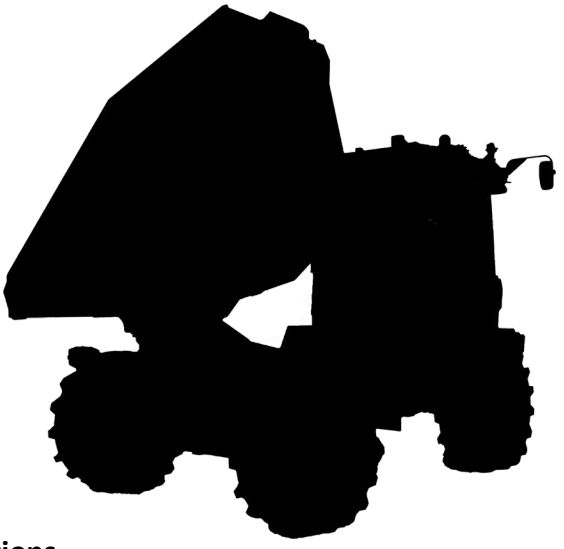
- Delivery all over Australia
- Hire for a day, a week or months
- Available in open and closed cabin options
- Delivered with a full tank of fuel
- Safety checked for your protection
- Operation manual and risk assessment documentation supplied

DV90 Wheeled Dumper (Dual View Closed Cab)



Operator comfort with a clear view in any direction.

Key features

The Wacker Neuson Dual View site dumper brings the very latest technology to your worksite. This machine allows the operator to easily see what's going on at every angle by rotating the console a whole 180°. Operation is safe and convenient thanks to a 7" colour display screen, and the closed cabin provides operator comfort whilst also reducing stress and fatigue particularly on long days thanks to air conditioning and heating.

Dual View technology makes the DV90 ideal for tight spaces, while also being a top performer with a 9000kg payload and high ground clearance. Hydrostatic all-wheel drive provides exceptional off-road capability and extreme gradeability. The infinitely variable 180° swivel tip skip lets you put your material exactly where you want it.

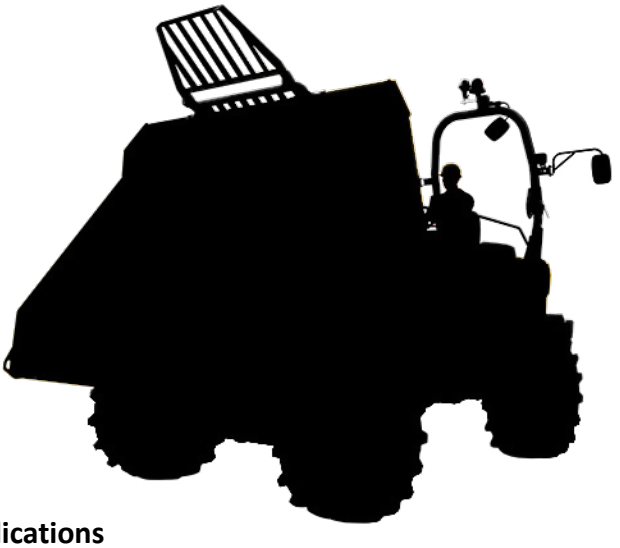
Applications

Dual View technology and operator comfort makes this DV90 ideal for stressful tight-access jobs including narrow roads, long single lane roads or railway applications. It's a great dedicated wheel dumper for moving material around or off site. Great off-road capabilities make the DV90 ideal on wet, muddy or sandy job sites.

Use the heavy duty skip for moving materials such as clay, stone, gravel, sand, asphalt, concrete or landscape materials including topsoil or mulch. The DV90 is ideal for mid sized construction, civil, dam or road projects, and capable of keeping up with demands on major project work in pairs. It's efficient and capable of moving large amounts of materials in a short amount of time - and cost effective compared to hiring larger dump trucks.

Shipping Weight:	Overall Width:	Overall Height:	Overall Length:	Payload:	Skip Capacity *(Heaped)*:
5250 kg	2420 mm	3382 mm	4891 mm	9000 kg	4350 L

DV90 Wheeled Dumper (Dual View ROPS)



A clear view in any direction.

Key features

The Wacker Neuson Dual View site dumper brings the very latest technology to your worksite. This machine allows the operator to easily see what's going on at every angle by rotating the console a whole 180°. Operation is safe and convenient thanks to a 7" colour display, and the open cab in combination with the machine's roll over protection structure (ROPS) provides excellent visibility with ease of access and egress.

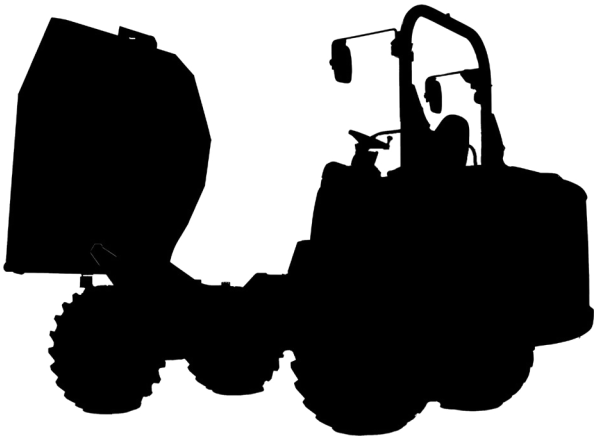
DW60 Wheeled Dumper (ROPS)



Impressive in every situation with a swivel tip.

Key features

The DW60 Wheeled Dumper is built for safe and convenient operation. It's ideal for limited spaces, thanks to the infinitely variable 180° tipping which allows operators to put material exactly where they want it. High ground clearance and a 6000kg payload means the DW60 is impressive in every situation. The roll over protection structure (ROPS) provides safety without sacrificing visibility, with ease of access and egress. Hydrostatic all-wheel drive provides exceptional off-road capability and extreme gradeability.

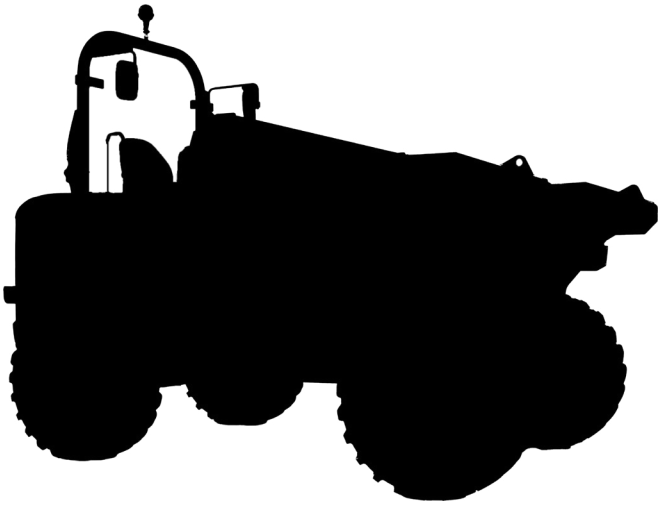
Applications

Use the DW60 as a dedicated wheel dumper for moving material around or off site. Great off-road capability makes the DW60 ideal on wet, muddy or sandy job sites. It's a heavy-duty skip for moving materials such as clay, stone, gravel, sand, asphalt, concrete or landscape materials including topsoil or mulch.

Ideal for small to mid-sized projects with narrow entrances, or working in pairs on larger sites. It's efficient and capable of moving large amounts of materials in a short amount of time - and cost effective compared to hiring larger dump trucks.

Shipping Weight:	**Overall Width:**	**Overall Height:**	**Overall Length:**	**Payload:**	**Skip Capacity** *(Heaped)*:
4866 kg	2250 mm	3110 mm	4935 mm	6000 kg	3200 L

DW90 Wheeled Dumper (ROPS)



Unbeatable off-road with swivel tip.

Key features

High ground clearance and a heavyweight 9000kg payload means the DW90 is impressive in every situation. The roll over protection structure (ROPS) provides safety without sacrificing visibility, with ease of access and egress. Hydrostatic all-wheel drive provides exceptional off-road capability and extreme gradeability.
