

# SP 55 Submersible Pump

Item Number: 0806677

# SP 55

## Tough, high volume submersible pump

>> Suitable for pumping from waste pits, dams, drainage trenches, footings, tanks, swimming pool excavations and manholes, etc. Designed for general purpose use by drainage contractors, plumbers, municipalities, service utilities, quarry pit operators, landfill sites, farmers, water contractors, etc. This unit can be used in many applications and will handle solids up to 15mm. The impeller can be adjusted to compensate for wear, without requiring special tools. <<

## Additional Advantages

- High-volume capacity – up to 55,000 litres per hour.
- Lightweight – one man operation
- Self-priming – no suction hose required
- 6 metre flexible shaft, featuring a quick-release drive coupling and external protection spirals. Suitable for connection to a number of Petrol and Electric Drive Motors
- Corrosion-resistant cast iron body, with a heavy duty lifting eye, multiple long-life seals, and an adjustable cast iron impeller.
- Rugged, low maintenance design, built in Australia for Australian conditions.
