Bolt On Pads →

If you want to:

- ✓ Extend the life of your machinery
- ✓ Use pads that survive the most extreme conditions thanks to cut and tear-resistant technology
- ✓ Have every component of your rubber track pad be up to the toughest of challenges
- ✓ Seek a “perfect fit” alternative to bolt-on track pads not compatible with your excavator
- ✓ And strive for cost efficiencies...
- ✓ Then give us a call and see how we can help you!

Then give us a call and see how we can help you!

Here's Why Customers Choose Our Pads

Easy to install and remove

All track pads come with the required hardware for installation.

Strong and durable

- **Don't get stuck in the dirt** – maximise machine flexibility and get yourself sorted with a set of clip on pads to put your machine to work on concrete and asphalt!
- **Advanced manufacturing process** – no recycled rubber here!
- **More stable and less likely to slip when digging or using various attachments** - resulting in a safer and more accurate operation
- **Less ground disturbance** and damage to working surfaces than steel track grousers
- **Quieter when traveling** ensuring operator comfort
- **Less vibration throughout the entire machine** - resulting in improved operator comfort and less wear and tear on your equipment
